Summary

I've had an interest in development from my early teens, making it part of my professional life from the age of 21. Working on multiple projects, both alone and as part of a team, I have been able to acquire the skills and knowledge used to develop professional, secure websites. During my time at status effect, I was able to also learn more about running live events and found a passion for a wide range of production equipment. Working with multiple online communities for video games has allowed me to set sail to new adventures. I am looking to develop my skills and experience with a company that can push me in a thriving environment.

Experience

Technology Director

Status Effect

Sep 2019 - Present (4 years 9 months)

Developing, integrating and managing a proprietary tournament platform for the Sea of Champions live events, including integration into the Microsoft Login platform. Running Live Production events for Rare Ltd remotely and within their studio, scheduling creators and ensuring talent was available and ready for their timeslot.

Cyber Society President

University of South Wales

Sep 2019 - Jul 2020 (11 months)

While studying, I helped set up and run the society at the institution, with weekly meetups and competitions.

Deloitte CTF Finalist

Deloitte

Dec 2019 - Dec 2019 (1 month)

Represented the University at the Deloitte CTF. The team came 3rd place in the finals.

BCS Cyber Crime Cup Finalist

Nov 2019 - Nov 2019 (1 month)

Represented the University at the BCS Cyber Crime Cup CTF. The team came 3rd place in the finals.

Tracelabs OPSEC CTF

Trace Labs

Nov 2018 - Nov 2018 (1 month)

Represented the University at the Tracelabs Open Source Intelligence CTF. The team came 4th place in the finals.

Metasploit Community CTF

The Metasploit Project

Nov 2018 - Nov 2018 (1 month)

Represented the University at the Metasploit Community CTF. The team came 17th Worldwide.

Education

University of South Wales

Bachelor's degree, Computer Security

2017 - 2020

Diving deep into computer systems, and how they are designed and secured, I have learned how to protect them against all kinds of attacks. Understanding how to develop with security in mind, along with building and maintaining an effective IT infrastructure while keeping all devices secure. With a final project on secure website development and the OWASP Top 10, I was able to successfully demonstrate an unsecure website and how attackers would break into the device while still being a fun and engaging event.

Skills

Live Event Production • Discord.js • Node.js • Back-End Web Development • PHP • PhpMyAdmin • MySQL • Search Engine Optimization (SEO) • Data Privacy • Github

Honors & Awards

ASDAN Peer Mentoring Award - ASDAN

Jun 2013

The ASDAN Peer Mentoring Short Course accredits up to 60 hours of peer mentoring activity, providing recognition for those who are learning, developing, practising and passing on their skills for mentoring younger students.
